Home Worker Plus for UK Gov & MoD

Delivering a Secure Homeworking Experience

The TriCIS homeworking kit is an all-in-one solution for secure homeworking catering to UK Gov and MoD security standards. We can provide several options suitable for the different tiers of homeworker requiring a secure working environment, from secure communication headsets to Viasat Eclypt Data-at-rest hardware.

The base specification of the homeworker kit features the powerful Dell 5400 Mobile Workstation, a D6000 universal dock and the TriCIS PTT unified communications headset, with options for additional 24" screens, a carry case and a Cisco Firepower NG 1010 Firewall for advanced threat protection.

As well as the security options above, TriCIS can offer bespoke connectivity across all their provided devices to ensure non-approved hardware cannot be connected easily. Users can additionally bolster their remote capabilities with Teradici Cloud Access Software and Cloud Access Software Plus which can be licensed from TriCIS directly.

Also available on request is the Dell Latitude Rugged range, which we can provide in the place of the 5400 in line with user requirements. This range is compatible with our EIEM solution and has several laptops available across the different MIL-STDs and IP-ratings.

Solution Blueprint

Dell 5400 Latitude
The Dell Mobile Workstation offers great performance at a reasonable cost. Available with either inline M.2 Eclypt DAR Encryption (Core 600 Standard) or standard fitted Eclypt Core 200, 300 and 600 2.5" drives. Optional Privacy filter available.

Dell U2419H 24" Monitor
Experience superb screen performance on this 23.8" monitor in an innovative, stylish thin design. Connects via either HDMI or DisplayPort directly to the D6000 dock for increased home productivity. Optional Privacy filter available.

TriCIS D6000 Dock
Docking station utilized for expanded connectivity featuring 2 recessed DisplayPort, 3 x USB over LEMO.

T-Zero PCoIP ZC Laptop
The T-Zero PCoIP Zero Client is a rugged zero client in a laptop form factor. It acts as a deployable endpoint able to securely connect to a PCoIP server.

[T-Zero]
