

## The TriCIS PTTUC Headset Unified Communications over Physically Isolated Line

### Exceptional Audio Clarity for Optimized Voice Calls

Put on the TriCIS PTTUC Headset and experience exceptional audio clarity whether you're on a conference call or listening to your favourite music. Enjoy optimized in-person call quality and music clarity with HD wideband voice and a dynamic equalizer. PTTUC works with most major unified communication platforms, and is certified for Microsoft Teams.

### Enhanced Voice with Built-in Noise Cancelling Mic

The TriCIS PTTUC Headset features a built-in noise cancelling mic, so that only your voice will be picked up and not the surrounding background noise. Comfortable leatherette ear cushions offer passive noise reduction, eliminating high frequency ambient noise.

### Enjoy Peace of Mind

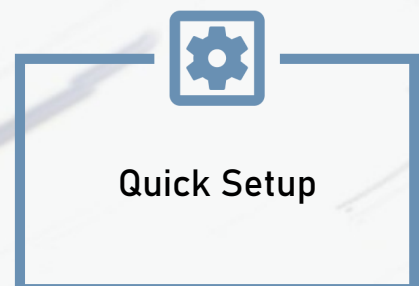

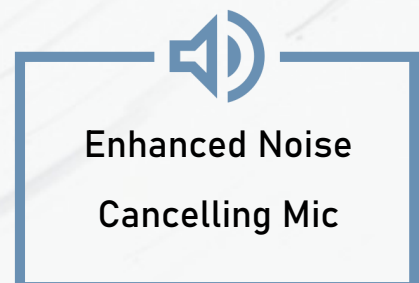

Tested and certified, the PTTUC is certified for Microsoft Teams, so you can rest easy, knowing your new headset meets the highest specifications in the industry.

### The TriCIS Element

The TriCIS PTTUC features a mechanical push-to-talk switch integrated into the line to provide a secure conversational platform and offers great functionality and convenience with the added benefit of crystal-clear stereo sound.

The headphones feature a mechanical switch which physically isolates the microphone line, preventing transmission unless held down.

For exclusive use of the 3.5mm configuration, we offer an option for a headset with a longer 2-meter audio cable.
